Mobby's solution for the best fitting wetsuits has born from the production result over 700,000 suits

[Anatomical Cutting Technology]

Premium

[mobility] [warmth] [durability]

Cutting technology aiming at "second skin" utilizing knowledge of anatomy

A.C.T. is MOBBY'S proprietary cutting technology that requires a suit to reproduce second skin. Based on the anatomy, the length, direction, and distribution of the skin's skeleton, muscles and skin that affect comfortable diving are analyzed and the best "Yutori" is placed in each part of the suit. We provide stress-free suits to all divers with cutting techniques that differ from conventional draping from the starting point of the idea.

Main material "Foamed Neoprene Rubber" selected by MOBBY'S

"Neoprene" is the main material of MOBBY'S wetsuits. It features excellent elasticity, durability and high heat retention and also the material itself expands and contracts, making it possible to create a comfortable fitting suit that fits the body. In addition, all candidate materials are placed in a high-pressure chamber of our own laboratory to inspect durability, conduct physical properties tests such as elasticity and weather resistance and conduct field tests on prototypes (in principle, 100 dives or more). Considering the environment in which the wetsuit is used, we use the best materials for diving.

Material(Surface/Lining)

FX/NP FX Span / Air nap 5mm • 19 Colors

□ Combination of warm stretch, high stretch jersey and brushed fabric.
 [Surface] FX Span is a high stretch jersey that allows you to choose from a wide variety of 19 colors. [Lining] NP (Air nap) is a brushed material woven from fast-drying polyester and braided soft, lightweight, warm nylon hollow fiber. It has excellent elasticity and is easy to move. If you turn it over during a break and dry it, it will dry quickly, reducing the discomfort of getting wet and you can wear it comfortably even after the second one.

FX/SP FX Span / Sport pile 5mm 3.5mm • 19 Colors

□ High-stretch jersey fabric with excellent mobility.
 [Surface] FX Span is a high stretch jersey that allows you to choose from a wide variety of 19 colors. [Lining] SP (Sports pile) is an attractive pile material that combines excellent flexibility and soft touch.

MS/NP Mesh skin / Air nap 5mm • Only Black is available

□ Combination of skin × brushed fabric with drainage and warmth.
 [Surface] MS (Mesh skin) is made of skin fabric with mesh processing. [Lining] NP (Air nap) is a brushed material woven from fast-drying polyester and braided soft, lightweight, warm nylon hollow fiber. It has excellent elasticity and is easy to move. If you turn it over during a break and dry it, it will dry quickly, reducing the discomfort of getting wet and you can wear it comfortably even after the second one.
 [Adopted model] Base fabric of MAXIMUM, QUEEN MAXIMUM and G.S.D.S.

MS/FD Mesh skin / Findex 3.5mm • Only Black is available

□ Skin jersey fabric with good drainage and elasticity.
 [Surface] MS (Mesh skin) is made of skin fabric with mesh processing. [Lining] FD (Findex) is a 2-way stretch jersey that expands and contracts vertically and horizontally.
 [Adopted model] Base fabric of MAXIMUM and QUEEN MAXIMUM

SS/NP **NEW** Smooth Skin / Air Nap 5mm • Only Black is available

□ Combination of skin × brushed fabric with drainage and warmth.
 [Surface] SS (Smooth Skin) is characterized by a smooth and glossy surface, and is popular with professional divers for its speed of drying and comfortableness to suppress the cold on land. [Lining] NP (Air Nap) is a brushed material woven from fast-drying polyester and braided soft, lightweight, warm nylon hollow fiber. It has excellent elasticity and is easy to move. If you turn it over during a break and dry it, it will dry quickly, reducing the discomfort of getting wet and you can wear it comfortably even after the second one.
 [Adopted model] Base fabric of OCEANS

* SS (smooth skin) is less resistant to scratching and tearing than jersey material, please pay special attention.

SS/FD **NEW** Smooth Skin / Findex 3.5mm • Only Black is available

□ A combination of skin × jersey with drainage and warmth and high performance.
 [Surface] SS (Smooth skin) is characterized by a smooth and glossy surface, and is popular with professional divers for its speed of drying and comfortableness to suppress the cold on land. [Lining] FD (Findex) is a 2-way stretch jersey that expands and contracts vertically and horizontally.
 [Adopted model] Base fabric of OCEANS

* SS (smooth skin) is less resistant to scratching and tearing than jersey material, please pay special attention.

Delivery time

□ Wetsuits, Hoods and Hood vest

6 business days

□ G.S.D.S.

8 business days

□ FREEDOM NEXST

10 business days

□ ACT APNEA

14 business days

• The shipping date is the day on which the above delivery date is counted in our business days from the date of order.
 • Orders up to 13:00 in Japan time are for the day and orders after 13:00 in Japan time are for the next day.
 • Our business days are weekdays except Saturdays, Sundays, Public holidays, summer and winter holidays.
 • The standard delivery date may be extended during the high season.
 • Depending on the contents of your order, such as special specifications, it may take about 2 extra business days.

Wetsuits fitting

There are settings for fitting. Please choose according to your environment.

[Standard] Optimal fitting as new.
 [Loose] Fitting with a little "Yutori" in the new condition.

If not specified, we will make it as standard.

WET SUIT

Features and Options

Neck (Skin touch)

The skin contact surface is made of skin material to improve fit and sealability. *DISCOVERY LIGHT is a standard neck.

Skin neck

The same material (smooth skin / stretch jersey) as the wrist seal of the drysuit is used for the neck parts. A smooth skin material that fits snugly against the skin prevents infiltration from the neck. [Standard] G.S.D.S.

Water cut processing

NEW
A water cut part is attached to the opening of the neck. Prevent water infiltration from the neck. [Standard] FREEDOM NEXST

Skin wrist

The same material (smooth skin / stretch jersey) as the wrist seal of the dry suit is used for the wrist parts. Smooth skin material that fits snugly against the skin prevents infiltration from the wrist. [Standard] MAXIMUM QUEEN MAXIMUM G.S.D.S.

4D Pads

It is a knee pad that combines independent resin parts. Flexible movement is ensured while enhancing knee protection. [Standard] MAXIMUM, QUEEN MAXIMUM, G.S.D.S., CABALLERO, and models that are not standard adoption can be selected as options.

Sholder protector

Abrasion-resistant jerseys are used on the shoulders that rub against the BCD strap. [Standard] MAXIMUM QUEEN MAXIMUM CABALLERO

YKK Aqua seal

A waterproof zip made of plastic. It is lighter and more flexible than a general waterproof zipper and can be opened and closed easily. [Standard] G.S.D.S. Models that are not standard adoption can be optionally selected.

Extra velcro

To prevent the neck velcro from adhering to the lining of the wetsuit when wearing the suit or taking off only the upper body during a break. * Not used for DISCOVERY LIGHT.

Back zipper (Spray-proof zipper)

A zipper with the function of suppressing inundation added to the standard zip. * DISCOVERY LIGHT use a standard zip.

Tape finish

By applying tape processing to the openings of the limbs, damage to the ends is prevented. However, processing will impair the elongation of the opening. [Standard] Models that are not standard adoption of wrist and ankle zipper can be selected for free.

Computer holder

Holder to prevent the dive computer from slipping or falling off. Available as an option.

Ankle zipper*

Attaching to the ankle makes it easy to put on and take off. [Standard] QUEEN / She's series (QUEEN MAXIMUM is not applicable). Non-standard models can be optionally selected.

Front short zipper*

If you open the zipper before entry or when traveling by boat, you can reduce the feeling of squeezing. Use a spray-proof zipper with high waterproof performance. [Standard] QUEEN CRUISE, Models that are not standard adoption can also be selected as an option.

Front long zipper*

Recommended for those who are not good at back zip and those who are worried about getting stuck in the back hair. MOBBY'S "Quick Off Lead" makes it easy to take off your shoulders. [Standard] Models that are not standard adoption can be optionally selected. (change from back zip to front long zip is free)

Wrist zipper*

Attaching to the wrists makes it easy to put on and take off. [Standard] QUEEN / She's series (QUEEN MAXIMUM is not applicable). Non-standard models can be optionally selected.

TEXION Pads

A silicone pad that protects the knee from chafing and does not hinder knee movement. * DISCOVERY LIGHT is PU pads.

Ankle zip, front short zip, front long zip and wrist zip may change design depending on installation.

Wet Mini Pocket

NEW
This mini pocket is perfect for storing hair elastics that are often lost when diving. Installation is optional. Applicable products are only She's COCO, QUEEN ROSARIO and QUEEN ALLURE. Please choose either right foot or left foot.

Refer to P02 Color List 10 (11 colors) for selectable colors.

MAXIMUM / QUEEN MAXIMUM

[XDS-6800 / XDS-8800]

Mobility and high functionality supported by professional divers
The ease of movement that is loved by professional divers and also recommended for beginners. Supporting its mobility is a mesh skin that combines both quick-drying and elasticity used for the base fabric. In addition, it is equipped with high-performance technologies such as "shoulder protect" and "4D pad" as standard.

Features Please refer to P04, 05

- Shoulder protector
- Neck (Skin touch)
- Neck Extra velcro (Full suits)
- Skin wrist
- Spray-proof zipper (Back zipper)
- 4D Pads

Options Please refer to P04, 05

- Wrist zipper
- Ankle zipper
- Front short zipper
- YKK Aqua seal (Full suits only)
- Change to back zipper (Long John)

※ Since it is a model with improved watertightness, we do not recommend attaching a wrist zipper, ankle zipper, front short zipper or tape finish around the wrist and ankle.

FREEDOM NEXST NEW

[XDS-4800]

New! Our unique technology A.C.T. Innovative whole body stitchless wetsuit

Whole body stitchless wetsuits that has been completed by maximizing our original cutting technology "A.C.T.". For a typical wetsuit require about 30 panels to assemble, but reduced to one-third or less, 9, and joined without using any thread. The small number of panels realized by the ACT not only brings out the original functions of the material, but also has no thread and needle holes, ensuring sufficient stretch and heat retention of the fabric and maximizing comfort when worn. To the limit. "NEXST", which stands for "No stitch Extra Seam Technology", also includes the meaning of "NEXT", which tells the dawn of a new wetsuit.

Difference in heat retention between stitched manufacturing method and non-stitched manufacturing method

The test was performed by immersing the test piece in the water tank with the plate ice. It can be seen that the non-stitched test specimen (right) has higher heat retention at the joint than the stitched one (left).

Anatomical Cutting Technology "A.C.T."

"A.C.T." is MOBBY'S original technology that applies knowledge of anatomy to cutting. We analyze the structure and movement of the human body that influences diving at the level of skeletal, muscular and skin characteristics and design the panels that make up the suit.

Super Stretch jersey for comfort in stitchless wetsuits
The ASH series of heather-like high stretch jersey is used for the surface and the high stretch brushed jersey is used for the lining. By covering the joint with wave tape (patented) made of highly stretchable material, the expansion and contraction of the fabric is not impaired and prevents entering seawater and cold air.

QUEEN ALLURE

[XDS-8500]

Long front zip eliminates the troublesome of putting on and putting off
Standard model of "Front Long Zipper" which releases women's divers from the trouble of "I'm not good at opening and closing the back zip" and "The hair entanglement when wearing it". In 2020, you can choose from three types of lining patterns that can be seen only when you open the zipper, including the conventional leopard pattern and zebra pattern, and the botanical pattern (ALBT) that elegantly creates a wetsuit. "Wrist and ankle zip" is standard function to reduce the troublesome of putting on and putting off.

[XDS-6700 / XDS-8700]

Long zipper on legs and arms for easy removal

MOBBY'S offers a long zipper wetsuit that is easy to put on and take off. A "straight long zipper" is placed on the legs up to the top of the thigh, and a "spiral long zip" is placed on the arms considering operability. Both long zippers are a coil type that raises and lowers smoothly, and the lining of the zipper minimizes water exposure. A wide variety of styles are available, including Fullsuit, Bolero, Seagull, and Long john.

※ Zipper will be shorter

Standard wetsuit

GENTY

The zipper on the back is 10cm ~ 15cm longer* than a standard wetsuit.
※ Zipper length is depending on body type.

The zipper on the arm extends about twice as long as a standard wetsuit.
※ Zipper length is depending on body type.

The leg zipper has a long specification that exceeds 70cm*, which is about four times the standard size. 4D Pads mounting can be selected by improving the panel layout.
※ Zipper length is depending on body type.

2 piece style ideal for tropical area with 2mm thickness but keep warmth

Suitable for scuba diving and snorkeling in the tropical area.

2 piece style is easy to put on and put off and it keeps moderate warmth while the thickness is extremely thin.

The secret is stitchless technology, no thread and needle holes ensuring sufficient stretch and heat retention of the material and maximizing comfort.

ACT APNEA

[XAP-1000]

Freediving suit to choose from 3 models

MOBBY'S freediving wetsuits are available in three lineups. For professional freedivers, there are competition-specific "competition models," "advanced models" that are suitable for both competitions and training, and "standard models" for training. Choose from 3 models according to your purpose and application.

Competition model (RT/CS SCS)
The finest model for elites aiming for world records. MOBBY'S technology A.C.T. and YAMAMOTO #45 · SCS, a super-stretchable and lightweight material, are fused to achieve the second skin. Silver SCS high lubricity treatment on both sides of the surface smooth skin and the lining cell skin reduces water resistance and facilitates attachment and detachment.

Advanced model (SS/SN)
The jersey lining enhances the durability of the joint, despite being a flexible stretch material. The versatile freediving-only model applied to both competition and practice is recommended for beginners because it is easy to handle.

Standard model (SN/CS)
Because the surface fabric uses a "stretch jersey" that is resistant to rubbing, it is ideal for training with weights. The "Sell skin" lining is a training model that adheres to the skin and exhibits a high thermal effect.

Features

Competition and advanced models are standardly machined to minimize water ingress. The processing location (Face, Wrist, Ankle) can be selected as you like.

Competition model

Sealing rubber
Adhering an elongated rubber piece inside the opening prevents water from entering.

Advanced model

Water Cutter
A slight slope inclined edge reduces water resistance and minimizes flooding.

Main material "neoprene sponge rubber" selected by MOBBY'S

"Neoprene sponge rubber" is the main material of MOBBY'S wetsuits. It features excellent elasticity, durability and high heat retention and also the material itself expands and contracts, making it possible to create a comfortable fitting suit that fits the body. In addition, all candidate materials are placed in a high-pressure chamber of our own laboratory to inspect durability, conduct physical properties tests such as elasticity and weather resistance and conduct field tests on prototypes (in principle, 100 dives or more). Considering the environment in which the wetsuit is used, we use the best materials for diving.

Material(Surface/Lining)

FX/NP FX Span / Air nap 4.5mm • 19 Colors

Combination of warm stretch, high stretch jersey and brushed fabric

[Surface] FX Span is a high stretch jersey that allows you to choose from a wide variety of 19 colors. [Lining] NP (Air nap) is a brushed material woven from fast-drying polyester and braided soft, lightweight, warm nylon hollow fiber. It has excellent elasticity and is easy to move.

LY/FD Lycra / Finedex 4.5mm • 18 Colors

Double-sided jersey fabric featuring high-grade gloss and color

[Surface] LY (Lycra) is a jersey fabric that is shiny and has good coloring. The water repellency treatment gives it good water clarity and also has heat retention. [Lining] FD (Finedex) is a 2-way stretch jersey that expands and contracts vertically and horizontally.

GRD/FD Grip radial / Finedex 2mm • Only Black is available

High-density radial fabric with crocodile pattern for improved durability

[Surface] GRD (Grip radial) is a rubber coated material that is pressed and compressed by embossing to increase rubber density. In addition to enhancing durability through this special processing, it also keeps the heat retention and buoyancy change due to the depth of inundation small. [Lining] FD (Finedex) is a 2-way stretch jersey that expands and contracts vertically and horizontally. [Adopted model] Base of CROCO DRY.

FD/FD Finedex / Fine dex 4.5mm • 8 Colors

Classic double-sided standard jersey fabric

[Surface] [Lining] FD (Finedex) is a 2-way stretch jersey that expands and contracts vertically and horizontally. [Adopted model] N.S.T.DRY, NEO DRY EM

Drysuit accessories

- All drysuits come with a non-woven bag, medium pressure hose, suspenders and zip wax. Please use the non-woven bag when you take it home from the place of purchase.
- In addition to the above, the dry suit comes with a simple repair kit (excluding Discovery Dry and Neo Dry EM).

FX/SP Span / Sport pile 4.5mm • 19 Colors

High-stretch jersey fabric with excellent mobility

[Surface] FX Span is a high stretch jersey that allows you to choose from a wide variety of 19 colors. [Lining] SP (Sports pile) is an attractive pile material that combines excellent flexibility and soft touch.

USRD/NP Ultra soft radial / Air nap 4.5mm • Only Black is available

Warm, durable radial x brushed fabric

[Surface] USRD (Ultra soft radial) is a material in which a skin fabric and a high stretch jersey are attached together and further radially coated. Water repellency reduces evaporation heat loss, prevents wind chill, is durable and has enhanced elasticity. [Lining] NP (Air nap) is a brushed material woven from fast-drying polyester and braided soft, lightweight, warm nylon hollow fiber. It has excellent elasticity and is easy to move. [Adopted model] Base of SHIELD MAX DRY.

FX/FD FX Span / Finedex 4.5mm • 19 Colors

Double-sided jersey with 20 colors to choose from

[Surface] FX Span is a high stretch jersey that allows you to choose from a wide variety of 19 colors. [Lining] FD (Finedex) is a 2-way stretch jersey that expands and contracts vertically and horizontally. [Adopted model] DISCOVERY DRY

Neoprene drysuit fitting

There are settings for fitting. Please choose according to your environment. If not specified, we will make it as standard.

- Body fitting**
 - [Standard] This is the best fitting when you wear "Comfort Aero" in a new condition or an inner with the same fabric thickness.
 - [Loose] This is the best fitting when you wear a thin inner + "Comfort Prime" (or inner with the same fabric thickness).
- Neck fitting**
 - [Standard] Fitting that minimizes the feeling of tightening as far as possible without flooding.
 - [Loose] Fit for wearing a neck belt. The feeling of squeezing on land can be reduced from "Standard".
- Neck height**
 - Standard or higher (+ 2cm) can be selected.
- Dry boots**
 - The boot size is 22 to 32cm (1cm increments).
 - The size of boots should be about + 0.5cm to 1cm.
 - Inner sole is attached (Please refer to item of inner sole below).
- Soft boots**
 - Boots size is 23 ~ 28cm (1cm increments).
- Inner sole** ※ Except when soft boots are selected
 - Usually "thin", if you choose boots + 1cm or more, "thick" is included.

The actual color tone of the actual product may be different from the catalog due to printing reasons. Please make sure to check the fabric color sample.

DRY SUIT Features and Options

Sholder protector

Abrasion-resistant jerseys are used on the shoulders that rub against the BCD strap.
[Standard]
SHIELD MAX DRY,
AQUANAUT DRY

Palm fit exhaust valve

The exhaust button can be operated easily and reliably even when wearing thick gloves. Automatic / manual exhaust pressure adjustment can be switched by lever operation. The thickness is about 2cm, which is thin. It is easy to clean the inside because the cover can be attached and detached without using tools.
[Standard]
All drysuit models

Wrist valve

Exhaust only raises arm. It is a useful item that can be used in environments where the posture is restricted, such as a wreck or a cave, or in a quick situation. With the lock function, the exhaust can be turned off.
[Standard]
CROCO-DRY, SHIELD MAX DRY.
For non-standard models, options are available.

Radial boots

Highly durable boots based on radially processed neoprene rubber. Because it is connected to the main unit, it prevents inundation from the ankles and cooling of the feet. The deck sole is non-slip, and the heel kickstand is convenient when taking off your boots.
[Standard]
All dry suit models

Palm fit inlet valve

The air supply button can be operated easily and reliably even when wearing thick gloves. Because it rotates 360 degrees, it does not limit the mounting position of the medium-pressure hose. Even if the hose comes off in the water, it is designed not to be flooded in the suit.
[Standard]
All dry suit models

YKK Aqua seal

A waterproof zip made of plastic. It is lighter and more flexible than a general waterproof zipper and can be opened and closed easily.
[Standard]
T4 Mover dry, Slash dry II, N.S.T. dry. For non-standard models, options are available.

Change to wrist exhaust valve on the wrist

Move the shoulder exhaust valve to the wrist to allow for easier operation of exhaust. Because it is easier to see and the exhaust volume is larger than at the shoulder, it can respond quickly and reliably to immediate exhaust. Another advantage is that the shoulder opening is clear and the BCD can be easily attached and detached. Options can be selected.

SI-TECH ^{NEW} SLÄGGÖ Flex Ring (Silicone)

Replaceable wrist seal system with excellent cost performance from SI-TECH. Options are available for CROCO DRY and N.S.T.DRY
※ Please refer to P.34 for details

Neoprene neck seal

Neck seal made of neoprene rubber. Folds inward to prevent flooding on neck. The joints of the parts are located in one place on the front to maximize the elasticity of the material.
[Standard]
All dry suit models

DUI Neck Zip Seal GII (Silicone)

DUI silicone neck zip seal system that can be easily replaced without tools. Options are available for SHIELD MAX DRY and QUEEN CRUISE DRY

SI-TECH ^{NEW} ORUST neck seal system (silicone)

Replaceable neck seal system with excellent cost performance from SI-TECH. N.S.T. DRY option is available
※ Please refer to P.34 for details

TEXION Pads

A silicone pad that protects the knee from chafing and does not hinder knee movement. * Discovery Light is PU pads.
[Standard]
N.S.T. DRY, T4 MOVER DRY, SLASH DRY II, AQUANAUT DRY, SEA ROSA DRY, SHE'S VISTA, QUEEN CRUISE DRY, ALTO DRY.

Foot valve

Exhaust valves for both feet to facilitate horizontal dive and head-first dive. With a lock function, you can turn off the exhaust when you want to keep the air. Options can be selected.

YKK Pro seal

It is a metal waterproof zipper. The combination of highly durable rubber tape and metal elements enhances waterproofness.
*For T4 MOVER DRY SLASH DRY II and N.S.T. DRY use Aqua Seal made by YKK. DISCOVERY DRY, and NEO DRY EM use DYNAT waterproof zipper as standard.

Neoprene wrist seal water cut processing

The inner skin material adheres to the skin and prevents water from wrists.
[Standard]
All models of Neoprene drysuit. CROCO-DRY and SHIELD MAX DRY have a water cut process at the end of the seal that makes it harder for water to enter.

4D Pads

It is a knee pad that combines independent resin parts. Flexible movement is ensured while enhancing knee protection.
[Standard]
SHIELD MAX DRY. Non-standard models can be selected as options. Excluding DISCOVERY DRY and NEO DRY EM

Soft boots

Rubber-reinforced, wear-resistant jersey boots are soft, light and easy to carry. It has the advantage that it can be completely turned upside down and full foot fins can be worn.
※ Options can be selected (excluding discovery dry and NEO DRY EM).

SHELL DRY SUIT Features and Options

YKK Aqua seal

A waterproof zip made of plastic. It is lighter and more flexible than a general waterproof zipper and can be opened and closed easily.
[Standard] All models of fabric dry suits.

Latex wrist seal

Latex wrist seals are extremely thin and highly elastic, so they are less squeezing when worn and easy to put on and take off. Highly water-tight seal that adheres to irregularities on the wrist.
[Standard] TECH SHELL AQUA, T4 SHELL AERO.

Neoprene wrist seal

The inner skin material adheres to the skin and prevents water from wrists. Options can be selected.
* The water cut processing on the photo will not be applied.

DUI wrist Zip Seal (Latex)

※ Please refer to P.34.
DUI latex wrist zip seal system that can be easily replaced without tools.
[Standard] T4 SHELL HD.

DUI wrist Zip Seal G1 (Silicone)

※ Please refer to P.34.
DUI silicone wrist zip seal system that can be easily replaced without tools. The seal of T4 SHELL HD can be changed. T4 SHELL AERO and TECH SHELL AQUA are available as options.

SI-TECH ^{NEW} SLÄGGÖ Flex Ring (Silicone)

※ Please refer to P.34.
Replaceable wrist seal system with excellent cost performance from SI-TECH. T4 SHELL AERO, TECH SHELL AQUA are available as options.

Please note: DUI wrist zip seals and SI-TECH SLÄGGÖ flex rings are not compatible.

Radial boots

Highly durable boots based on radially processed neoprene rubber. Because it is connected to the main unit, it prevents inundation from the ankles and cooling of the feet. The deck sole is non-slip, and the heel kickstand is convenient when taking off your boots.
[Standard] All dry suit models

Neoprene socks

Wear-resistant jersey socks are soft, light and easy to carry. It has the advantage that it can be completely turned upside down and full foot fins can be worn. Options can be selected.

Neoprene neck cover

Neoprene cover with mesh drain holes to prevent puddles protects the neck seal and increases heat retention.
[Standard] All models of shell dry suit.

Latex neck seal

Latex neck seals are extremely thin and highly elastic, so they are less squeezing when worn and easy to put on and take off. Highly water-tight seal that adheres to irregularities on the wrist.
[Standard] TECH SHELL AQUA, T4 SHELL AERO.

Neoprene neck seal

Neck seal made of neoprene rubber. Folds inward to prevent flooding from neck. The joints of the parts are located in one place on the front to maximize the elasticity of the material.
[Standard] T4 SHELL HD (Neoprene seal custom specification). Options are available for T4 SHELL AERO and TECH SHELL AQUA

DUI neck Zip Seal G1 (Latex)

※ Please refer to P.34.
DUI latex neck zip seal system that can be easily replaced without tools.
[Standard] T4 SHELL HD

DUI neck Zip Seal G1 (Silicone)

※ Please refer to P.34.
DUI silicone neck zip seal system that can be easily replaced without tools. The seal of T4 SHELL HD can be changed. T4 SHELL AERO and TECH SHELL AQUA are available as options.

SI-TECH ^{NEW} ORUST neck system (silicon)

※ Please refer to P.34.
Replaceable neck seal system with excellent cost performance from SI-TECH. T4 SHELL AERO, TECH SHELL AQUA can be selected as option.

Please note: DUI wrist zip seals and SI-TECH Orust neck system are not compatible.

Wrist valve

Exhaust only raises arm. It is a useful item that can be used in environments where the posture is restricted, such as a wreck or a cave, or in a quick situation. With the lock function, the exhaust can be turned off. Can be selected as option.

Foot valve

Exhaust valves for both feet to facilitate horizontal dive and head-first dive. The lock function allows you to turn off the exhaust when you want to keep the as. Options can be selected.

Fabric drysuit material description

【Moisture-permeable waterproof material】 T4 SHELL AERO

This is a lightweight material that does not allow water from the outside to pass through and also does not allow steam and air inside to permeate. [Outer layer] Highly wear-resistant CORDURA330D / [Middle layer] High-hydrolysis-resistant polycarbonate-based moisture-permeable waterproof laminate / [Inner] tricot fabric, made up of five layers. The inner tricot fabric maintains a dry texture and maintains the comfort of the suit.

【CORDURA330D/PVC】 T4 SHELL HD, TECH SHELL AQUA

"CORDURA" is a special fiber that is resistant to tearing and abrasion and has seven times the durability of nylon. MOBBY'S uses CORDURA330D, which has a good balance between durability and weight, as a material exclusively for fabric drysuits. Backside Double PVC coating, which has a reputation for excellent waterproofness, prevents water from entering the fabric. The body temperature is radiated by silver metallic processing to increase the heat retention effect.

【Seam part liquid seal processing】 T4 SHELL AERO

The inner seam is sealed with a flexible urethane-based repair material instead of conventional waterproof tape to ensure a highly reliable waterproof function. Liquid seal processing is a standard method used in the US where fabric drysuits are the mainstream. Reliable for stable performance.

SHELL DRY OPTION NEW "SEAL SYSTEM"

Select the material, structure, and function for the neck and wrist seals.
In 2020, MOBBY'S introduced a new option for the three fabric drysuits, the Seal System, which allows the selection and replacement of the neck seal and the wrist seal. Seals with different materials, structures and functions are used depending on the purpose and style of the dive so that the stress caused by equipment can be further reduced.

[Recommended selection model]

※ DUI zip seal system does not require tools to replace the seal, but does require soapy water.

DUI www.divedui.com/
Drysuit manufacturer founded in 1963. The high-quality products produced at their own factory in San Diego, California, have gained overwhelming support from military and professional divers in the United States and other countries.

SI TECH www.sitech.se/
A Swedish manufacturer that develops and manufactures diving equipment and special military equipment. Proven dry suit materials provide a comfortable diving environment for divers around the world.

T4 SHELL AERO [KDD-2600 (SHELL)]

Comfort, strength, and weight reduction are well-balanced
MOBBY'S adopts a laminated material of moisture-permeable waterproof membrane jointly developed with a material manufacturer in Japan and a highly wear-resistant fiber "CODURA330D" to reduce the dew condensation in the suit, achieve comfort and durability, and reduce weight. The flexible plastic waterproof zip "YKK Aquaseal" is laid out in the 4th thoracic vertebra (T4) position, which is hardly subjected to diving stress, so that the freedom of the upper body can be significantly increased. In addition, the knees and hips, which are easy to rub, are reinforced with Melco dot sheets, and large side pockets (three-chamber structure and D-ring) are standard equipment to support hard diving scenes.

Neoprene cover with mesh drain holes protects neck and enhances heat retention
Melco dot sheet is applied to both knees and hips which are easy to rub

T4 SHELL HD

[KDD-2400 DUI zip seal type (latex)] [KDD-2410 directly attached neoprene seal type]

Strength and function to enjoy a diving trip with peace of mind

"CORDURA330D" with excellent abrasion resistance is used for the outer material, and a proprietary material laminated with PVC is used for the lining. The outer joint is reinforced with dot tape and the lining is reinforced with PVC tape. In addition, the flexible plastic waterproof zip "YKK Aquaseal" is laid out in the 4th thoracic vertebra (T4) position, which is hardly subjected to diving stress, so that the freedom of the upper body can be significantly increased. The neck and wrist seals are equipped with the "DUI Zip Seal System GI (Latex)" that can be replaced without using any tools, so that the risk of breaking the seal and stopping the dive trip can be avoided.

Material

CORDURA330D/PVC coating

CROCO DRY FZ/BZ

[XDD-5600]

MOBBY'S Highest durability materials and craftsmanship
 Uses GRD (Grip Radial) / FD (Faindex), a material that compresses radially coated 3.5 mm neoprene rubber to about 2mm. "GRD" with radial coating boasts the highest durability among the materials developed by MOBBY'S, and in general, the panels to be sewn are glued with the hand-applied technology of craftsmen, Prevents material deterioration due to seawater immersed in the needle hole through the sewing thread. Compressed material with high rubber density, as well as high durability realized by material and technology, has a small change in buoyancy, so that the weight can be reduced.

GRD(Croco pattern embossing)

N.S.T. DRY (Non Stitch Technology DRY) NEW
[XDD-5900]

The stitchless dry suit with color choices

N.S.T.DRY does not sew the panel with needle and thread, so there is no risk of submergence due to the decrease in heat retention due to the needle hole and the penetration of the needle hole. Also, there is no need to worry about the yarn fraying due to aging. You can also select a color that was not possible with a conventional radial-based non-stitch dry suit, and you can now choose from 8 colors.

2-way stretch jersey that expands and contracts vertically and horizontally on the front and back fabrics

Both the front and back fabrics use a 2-way stretch jersey that expands and contracts in two directions, vertical and horizontal. The knees are fitted with "Texion Pads" that protect against rubbing without hindering movement.

Optional selection of neck zip seals that can be replaced without tools.

An option is available for DUI silicone neck zip seal system, which can be easily replaced without tools.

T4-MOVER DRY

[XDD-6500]

Increased freedom of upper body and lighter weight

The lightweight and flexible plastic waterproof zip "YKK Aqua Seal" is laid out in a position where stress is hardly applied when diving. The flexibility of the upper body has been greatly increased compared to general dry suits, and the weight has been further reduced. In addition, the strength has been improved by reinforcing the shoulders and both sides, which may rub against the BCD strap and weight belt.

SLASH DRY II

[XDD-5700]

Enjoy the structure and color selection that can be worn by yourself

The biggest feature is the "telescope structure" that enables detachment by one person. The front zip adopts a lightweight and flexible plastic waterproof zip "YKK Aqua Seal" that can be easily opened and closed, and if you extend the fold of the waist, you can afford a length and you can smoothly attach and detach without the help of a buddy. In addition, it is recommended for divers who want a fashionable dry suit because they can select the color of upper and bottoms respectively.

SHE'S VISTA DRY

[XDD-9300]

A bold design with a sense of fun

A dry suit for women who likes mode style that has a bold layout of sharp V-shaped panels. In 2020, we have prepared a new pattern "MDSE" that expresses "VISTA" with beach photo prints. It is a playful design, such as attaching a "glass holder" to the chest where you can put on sunglasses and glasses removed on the slope.

AIR FUSION NEW

Made of a 1mm thick neoprene rubber bonded with a nylon 2WAY stretch jersey and hollow fiber brushed jersey. The hollow-fiber brushed jersey which touch the skin is made of lightweight polyester with high thermal storage. It dries quickly, and if you turn it over after the dive, you can wear it smoothly for the second dive. Considered to be worn as the innerwear of a wetsuit, it was finished with flat sewing. It can be used alone in tropical areas where the water temperature is high. Available in two styles: topper and long pants.

A.C.T. GLOVE RENEWAL

[DA-1320]
Material: 1mm Synthetic leather neoprene
Color : Black
Size (hand circumference) :
XXS(17cm), XS(19cm), S(21cm), M(23cm), L(25cm), XL(27cm)
※ Available in late March

It is a three season glove proposed by MOBBY'S. The joints have slits to make it easier to move your fingers. In addition, considering underwater photography, the right hand can expose the thumb and forefinger, and the left hand reinforces the fingertip, making it hard to be damaged even if you grab rocks. The light gray color in the palm of the hand makes it easier to check hand signals. Short wrists make it easier to see the dive computer underwater. The 2020 model has improved materials to make it easier for the fingers to bend and stretch.

ZOOM UP GLOVE

[DA-1150]
Material : 2.5mm neoprene
Color : Black
Size (hand circumference) :
XS(19cm), S(21cm), M(23cm), L(25cm)

Neoprene gloves with high stretch jersey on the entire surface for easy finger movement. Panel joints are rubber coated to increase strength. Wear-resistant jersey on thumb, forefinger and middle fingertips for extra durability. The palm with a "whale tail"-patterned gripper keeps it from slipping even when wet. Easy to put on and take off with our original wrist flap. This glove is recommended for underwater photography in winter.

A.C.T. BOOTS LIGHT

[DA-2610]
Material : 3.5mm neoprene
Color : Black
Size : 23cm ~ 28cm

Full foot fins with barefoot feeling!
Adopting a durable stretch jersey that is easy to move and easy to fin kick on the instep. The other parts use fast-drying skin material. High elastic rubber coating is applied to the outer panel joint to strengthen the joint part. In addition, the sole is reinforced with rubber, making it less slippery and easier to walk.

WATER PROOF BAG

[BG-9940]

Material : Polyester
Color : Black, Blue
Size : 56 × 42 × 14 (cm)

The waterproof bag is a convenient item that can be used not only to carry things you do not want to get wet, but also to store wet things together. The lightweight polyester bag is the right size for towels, swimwear and small items. You can carry it easily like a backpack and fold it up compactly when not in use. The opening structure has been devised to make it easier to put things in and out.

※ Please be forewarned when sold out as it will be limited to stock.

Blue

Black

SACOCHE BAG

[BG-9800]

Material : 2mm Neoprene
Color : Black
Size : 25 × 20 (cm)

Made of mesh skin material. Pursued ease of use with a simple and sporty design. Some wet is OK because it is a skin material used for wet suits. A Craftsman hand-craft each one at the Ishinomaki factory, so it may take some time for delivery depending on the stock status.

AIR SHELTER BREATHABLE AIR SHELTER SKIN

[AG-5010]

Material : 2mm Neoprene (Ventiprene)
Color : ROSE PINK, YELLOW, POWDER BLUE, BLUE, BLACK GREY, SKIN BLACK
Size : S, M, L, XL (XL is blue and black gray only)

[AG-5011]

Material : 2mm Neoprene (Skin)
Color : Skin black
Size : S, M, L, XL

The boat coat made of lightweight, hard to get humid and breathable "Neoprene that breathes" is finished in "just the right size" to be worn over wetsuits and swimwear. Because the original logo and name can be printed, it is also recommended as teamware (Chargable option).

※ Air shelter skin (skin black) does not have moisture permeability

※ The original logo and name cannot be printed to the Air shelter skin (skin black).

BEANIE

[DA-5830]

Material : 2mm Neoprene
Color : ASH NAVY, POWDER BLUE, ROSE PINK, YELLOW, BLUE, BLACK, PINK
Size : S (head circumference 52-53cm) M (head circumference 54-56cm) L (head circumference 57-59cm)
※ S Size is ASH NAVY, POWDER BLUE, ROSE PINK, YELLOW, only

MOBBY'S beanie is now a standard product for those who feel oppression and difficulty in hearing the standard food. Unisex design that extends the range of coordination regardless of gender. It is easy to get rid of, and also keeps the hair from spreading in the water, preventing scalp sunburn in summer. It is a neoprene rubber material, but the outer material is ribbed and looks and feels like a knit. The ears are made of mesh material and do not interfere with hearing. In response to customer requests this term, we added S size to some colors.

Flexible dry hood is recommended for wet season. A skin face seal that fits perfectly on the face keeps water out. Furthermore, Mobby's original exhaust system (S.E.V.) is adopted, which reliably discharges the air inside the hood and does not allow ingress of water from outside. The material of the neck is also stretchy and easy to wear, reducing the tightness of the neck. The zipper is useful for women with long hair.

ICE HOOD

[XDA-5000]
 Color : Black
 Size : Ready-made or Order (Free of charge)
 Material : HP/RT(5mm)

The best food for ice diving.
 The face seal covers the face widely, and the lining uses a skin material that adheres to the skin to minimize inundation.

S.E.V. (Soft exhaust valve)
 This is Mobby's special function, which does not allow water to enter while discharging air from the hood. Standard on all dry and ice foods.(Utility model)

COMFORT AERO

[AAG-6110]
[AAG-6140]
Material : TORAY KARUISHI (Polyester)
Color : Black
Size : XXS, XS, S, M, L, XL

It is an inner for exclusive use of dry suits developed with the hope that many divers can enjoy diving comfortably. Toray's "KARUISHI" is used for the entire tops and bottoms. Thick brushed high heat retention and heat insulation confine heat and feel smooth. This is very comfortable. The outer fabric is a material that is resistant to rubbing with the back fabric of the dry suit. The left arm has a pocket for storing valuables such as locker keys, and the elastic band attached to the bottom hem is designed to prevent the hem from turning up when wearing a dry suit.

Conventional organization **KARUISHI**
Surface yarn (First layer)
Back yarn (Second layer)
Brushed yarn
Cross section image
Air pockets are formed by special brushing of fine and soft polyester.
Keeps heat in and keeps it warm and feels smooth.

Crotch to Ankle	63	65	68	70	70	73	73	75	78

Inner for fabric dry. Adopted "PRIMALOFT" insulation developed for the US military, which requires rigorous training, and combines warmth, lightness, strong water repellency, and ultra-fast drying. It incorporates detailed considerations in pursuit of usability, such as a ventilator for both upper arms (easy to exhaust dead air in the inner) and a feet code (to prevent the hem from rolling up). Even neoprene dry can be worn by adjusting the fitting.

SHELL DRY HOOD

[XDA-4900]
Material : FX/SP(3.5mm)
Color : Black
Size : Size Ordered Products (Free)

The latex neck seal that comes standard with the Shell Dry is a special hood that is recommended for divers who are concerned about cold protection due to its thinness, and that keeps the heat around the neck.

Ready made size chart (cm)							
	S	MS	M	ML	L	XL	XXL
Head	54-55	55-56	56-57	57-58	58-59	59-60	60-61
Neck	29-31	31-33	33-35	35-37	37-39	39-41	41-42

SHELL DRY GAITER

[OA-0670]
Material : 300D Cordura Nylon
Color : Black
Size : Free

When wearing a shell dry, it keeps a safe and stable posture by attaching it under the knee where air tends to accumulate and float. The Velcro & buckle adjust function allows you to securely attach to any leg size.

ANKLE WEIGHT SET

[DA-6030]

ANKLE WEIGHT (250g)

[DA-6020]

ANKLE WEIGHT COVER (1PC)

[DA-6010]

Color : black
Size : Free

Peel off the velcro and insert the attached shot weight into your pocket.

Ankle weight set with 2 weight covers and 4pcs 250g shot weights. The weight can be put in and out of your pocket and you can use your favorite weight from 250g or 500g. Weights distributed between the two pockets fit the foot securely. In case of damage or loss, it is possible to purchase a single item from one weight (250g).

Contents: Weight cover x 2, Shot weight 250g x 4

DRY SUITS BAG

[BG-9310]

Material : 210D Nylon / Lining PVC
Color : Black

Fold bulky dry suit compactly and make carrying of suit comfortable to diving point. The inner mesh structure keeps the suit from getting humid and can be used as a shoulder bag with a longer strap. After moving, take out the dry suit immediately and do not leave the suit folded for a long time.

SHOT WEIGHT(1kg)

[DA-5000]

Material : Nylon Oxford
Color : Black
Weight : 1kg

Soft weight with no corner contact. Packed with 1kg lead grains in durable nylon.

NECK BELT

[OA-0640]

Material : Neoprene, Nylon
Color : Black
Size : Free

Enhances the water tightness of the neck of the neoprene dry suit. The simple structure of the double-sided jersey makes it easy to install and has excellent durability. The bulge is applied to the behind the neck to reduce the risk of flooding. Names can be entered in the margins of the logo to help prevent loss.

WRIST & ANKLE BELT

[OA-0660]

Material : Neoprene
Color : Black
Size : Free

Improves the water tightness of the neoprene dry suit wrist and ankle.

R2 WETSUITS HANGER

[SP-0010]

Color : Black, Blue

The foldable hanger is a convenient accessory that can be set by entering the suit from the neck in the folded state. There is no need to open the zip and the durability is outstanding. Adopts a concave air vent structure that allows air to pass, further speeding the drying of the suit.

RING HANGER

[OA-0900]

Material : Neoprene
Color : Random

The gloves and boots can be dried with the opening facing downward, so that the water drains and dries quickly.

AROMA WET

[OA-0111]

[OA-0112]

Wash wetsuit with one push wash and rinse. It also works as a softener and has deodorant and aroma effects. There are two types, a "milky type" that emphasizes flexibility and a slight fragrance, and a "clear type" that emphasizes cleaning and deodorization. Both types can refresh the wet 20 times with one!

DESICCANT

[OA-0940] LONG

[OA-0941] SHORT

For drying, deodorizing, and preventing shape loss. Absorbs the unpleasant smell of sweat and the outer fabric is treated to prevent bacterial growth. After use, it is a playback type that can be dried and used repeatedly.

SEAT COVER

[OA-1840]

Material : Neoprene
Color : Black

Cover for car seats made of neoprene material. Even if you get on a wet swimsuit, wet suit, or dry suit, it will not wet the car seat. Easy to wear simply by hanging on the headrest. It can be stored compactly with the attached belt.

INNER SOLE

Thin [DA-8003]
Color : Black
Thick [DA-8004]
Color : White

Inner sole with antibacterial and deodorant function, adjusting the fitting of boots with thin and thick. Two types are available: thin (black) and thick (white). For those who purchase dry suit, we attach it free of charge.

SAFETY SOLE

[DA-8005]
Size : 22 ~ 28cm

An inner sole that prevents stepping out of dangerous materials. Stepping resistance test = JIST8101: 2006, strength of 2290N (≒ 230kg) or more has been proven at disaster sites. Comfortable with soft coating.

ZIP TECH NEW

[OA-0050]

This is a maintenance product exclusively for YKK's plastic waterproof zip "AQUA SEAL". Apply regularly to prevent a drop in waterproofness.

※ Please refer to the attached manual when using

ZIPPER WAX

[OA-0004]

Dry suit wax pen type
Improves water tightness and improves slider sliding.

TALCUM POWDER NEW

[OA-0006]

When storing a dry suit, apply it to the neck or wrist seal made of latex to prevent the latex from sticking together. Also, when wearing a wetsuit, sprinkle it on the inner skin material to make it easier to put on and take off.

UV PROTECTANT NEW

[OA-0300]

Spraying protects drysuit latex necks and latex wrists from UV degradation.

mpac+Dive

[MP-0010]

Color : BLK, WHT, BLU, PNK
Size : 105×202×10 (mm)
Material : TPU

A smartphone case that allows you to operate the screen up to a depth of about 30 m and shoot underwater. Water and dust protection at a depth of 200 m has achieved the highest IP68 rating. In addition to installing a filter that allows you to see the screen in natural colors even in deep fields, the design that floats in the water and the hand strap prevent sinking, so you can use your smartphone comfortably and safely while diving.

※ Please be forewarned when sold out as it will be limited to stock.

mpac+Snorkel

[MP-0020]

Color : BLK, WHT
Size : 117×210×10 (mm)
Material : PVC

Waterproof smartphone case for underwater photography by snorkeling. The waterproof and dustproof performance has acquired the highest level of IP68, enabling waterproofing up to a depth of 10 m and screen operation at a depth of 5 m. The design that floats in the water and the hand strap prevents sinking when you release your hand, making it suitable for use in water sports such as snorkeling, canoeing, SUP and baths, and measures against sand at the seaside.

※ Not compatible with diving water depth.
※ Please be forewarned when sold out as it will be limited to stock.

LATEX SEAL REPAIR KIT

Latex seal repair kit (repair material for latex directly attached to fabric dry)

[OA-0710] Full complete set

Contents: neck, wrist, socks, bond, brush, sandpaper
List size: small (diameter 26cm), large (diameter 30cm)

Socks size: S (21-23cm), M (24-26cm), L (27-29cm)

[OA-0730] Semi-complete set

Contents: neck, wrist, bond, brush, sandpaper

[OA-0740] Neck seal set

Contents: neck, bond, brush, sandpaper

[OA-0750] Wrist seal set

Contents: list, bond, brush, sandpaper

[OA-0760] Socks set

Contents: socks, bond, brush, sandpaper

[OA-0780] Bond kit

Contents: Bond, brush

LATEX SEAL REPAIR KIT
Semi-complete set

SHELL DRY SPARE PARTS

Spare parts that can be replaced on the spot if the seal is broken during a dive trip.

[OA-0380] DUI Neck Zip Seal GI (Latex)

[OA-0390] DUI wrist zip seal (latex) one side

[OA-0381] DUI Neck Zip Seal GI (Silicone)

[OA-0391] DUI wrist zip seal (silicon) one side

[OA-0360] SI-TECH Silicon neck seal (NECK Tite)

Neck circumference: 38.4cm or less (small) / 38.4cm or more (large)

[OA-0370] SI-TECH Silicon Wrist Seal One Side (Quick Cuff)

Wrist circumference: 16.9cm or less (small) / 16.9cm or more (large)

[OA-0362] SI-TECH Silicon Neck Seal (Orust Neck System)

[OA-0372] SI-TECH Silicon Wrist Seal One (SLÄGGÖ Flex Ring)

NEOPRENE SUIT REPAIR KIT

Repair material for wet and dry suits made of neoprene. If you purchase a neoprene dry suit, we attach it free of charge.

[OA-0005] Skin gripper (tube type)
Contents: Glue for repairing neoprene suit

AMBASSADORS

Yasuaki Kagii

MOBBY'S has networked with domestic and international top divers to develop the world's most advanced products. They are also evangelists who try out the ideas they have proposed and communicate their results.

Born in Hyogo in Japan. Underwater photographer, SSI dive control specialist. Improve the underwater photography skills while working as a diving guide in Australia, Izu and Maldives. The shooting range is wide, from plankton to whale, and since the disaster of "3.11", he has been recording the sea of Iwate. He has appeared in many Japanese media and has published many photo books. Awarded the 2003 New Photography Award of the Japan Photography Association. In 2013 and 2015, he received the Nikkei National Geographic Excellence Award.
